

Spring into Savings!

Follow these smart saving tips!

Beat the Heat:

Schedule your AC tune-up now to ensure smooth operation and avoid costly summer emergencies.

Fan Fact:

Remember, fans cool people, not rooms. Turn them off when you leave to save energy.

Outdoor Eats:

Enjoy the spring weather and keep your home cooler by grilling or smoking outdoors.

Smart Shade:

Consider planting shade trees or trellised vines to reduce solar heat on your home and consider planting shrubs to shade your AC unit, which can improve its efficiency. Remember to keep foliage trimmed and away from the unit itself.

Fresh Air Flow:

When the weather is nice, open your windows and enjoy the natural ventilation before switching to AC.

Let There Be Light (Naturally!):

Maximize daylight by opening blinds and only use artificial lights when necessary. Remember to close them when the sun is intense and turn off lights when you leave a room to keep things cooler.

Project Share

To enroll in the Project Share program, please scan this code or fill out the form on the next page, and mail it to our Customer Service Center.

Continued on Back

Together, We Can Keep Our Community Warm.

This is a voluntary program, created to assist needy households in paying their winter energy bills. You can help by adding a regular Project Share (PS) contribution to your monthly utility payment, or by making a direct donation to Project Share. These funds will then be distributed to neighbors in need for winter energy costs. Those qualifying for help will be carefully identified by an area social service agency. A local committee will oversee Project Share to guarantee all contributions will be handled equitably and efficiently.

Project Share

Sewer Reduction Meters

Save money on your sewer bill with a temporary or permanent meter!

Temporary Sewer Reduction Meters: These are available upon request from IMU and hook up directly to your outdoor water spicket. They track how much water you use for large events, like filling a pool, and that amount is then deducted from your sewage bill since it doesn't enter the sewer system.

Permanent Water Only Meters: Thinking about regularly watering a big garden? Consider installing one of these inside your home. They measure all your outdoor water use so you only pay for what goes down the drain.

Ready to save? Call the IMU CSR office at 515-961-9444 Option 2 to check on meter availability.

Cost of Sewer
Reduction Meter:

\$35
for 2 weeks

Cost of
Water Only
Meter:

\$650
+ \$50 Installation Fee
Cost could vary per size of water meter
