

Interesting Facts

About Iowa Energy

Iowa uses approximately 45.7 terawatt-hours (TWh) of electricity annually, which represents about 1% of the total U.S. electricity consumption

Iowa is the nation's largest fuel ethanol and biodiesel producer. It accounts for slightly more than one-fourth of U.S. fuel ethanol production capacity and almost one-fourth of biodiesel production capacity.

In 2023, wind turbines generated 59% of Iowa's electricity, the highest wind power share for any state.

Iowa ranks among the 10 states with the highest electricity sales per capita and is among the 10 states with the lowest average electricity price.

Iowa is the only non-crude oil-producing state among the top 10 states in total energy consumption per capita.

Iowa is the fifth-largest consumer of hydrocarbon gas liquids, mostly propane—which is used for drying the state's large harvested corn crop. One in eight Iowa households heats with propane, which is almost triple the national rate.

Employee Feature

Trystan Minnis

Water Department

What sparked your interest in this field?

I would say the interest in the job didn't happen until I started and fully realized how much this job would challenge me. I was happy I found a career path that would allow me to grow within the job itself and expand my knowledge in a field I didn't know a lot about. The idea of being the person that treats the public water supply and the responsibility that comes with it is the most rewarding part of the job.

Where did you get your education or training?

The nice thing about Water department is the ability to have hands on training and provides me the resources to study for my different water licenses. Also, the ability to take self study college courses really helped me get my water treatment grade 2 and distribution grade 2 licenses.

Why did you want to work for IMU?

The idea of a career change in the same year of having a baby was definitely a decision I didn't take lightly. I talked to an IMU employee and they told me all the pros and cons and how great working for IMU was. One of the highlights was being close to home. While interviewing at the water department I had the opportunity to meet all the staff. I could tell it was a great group of individuals to work with.

What do you like most about your job?

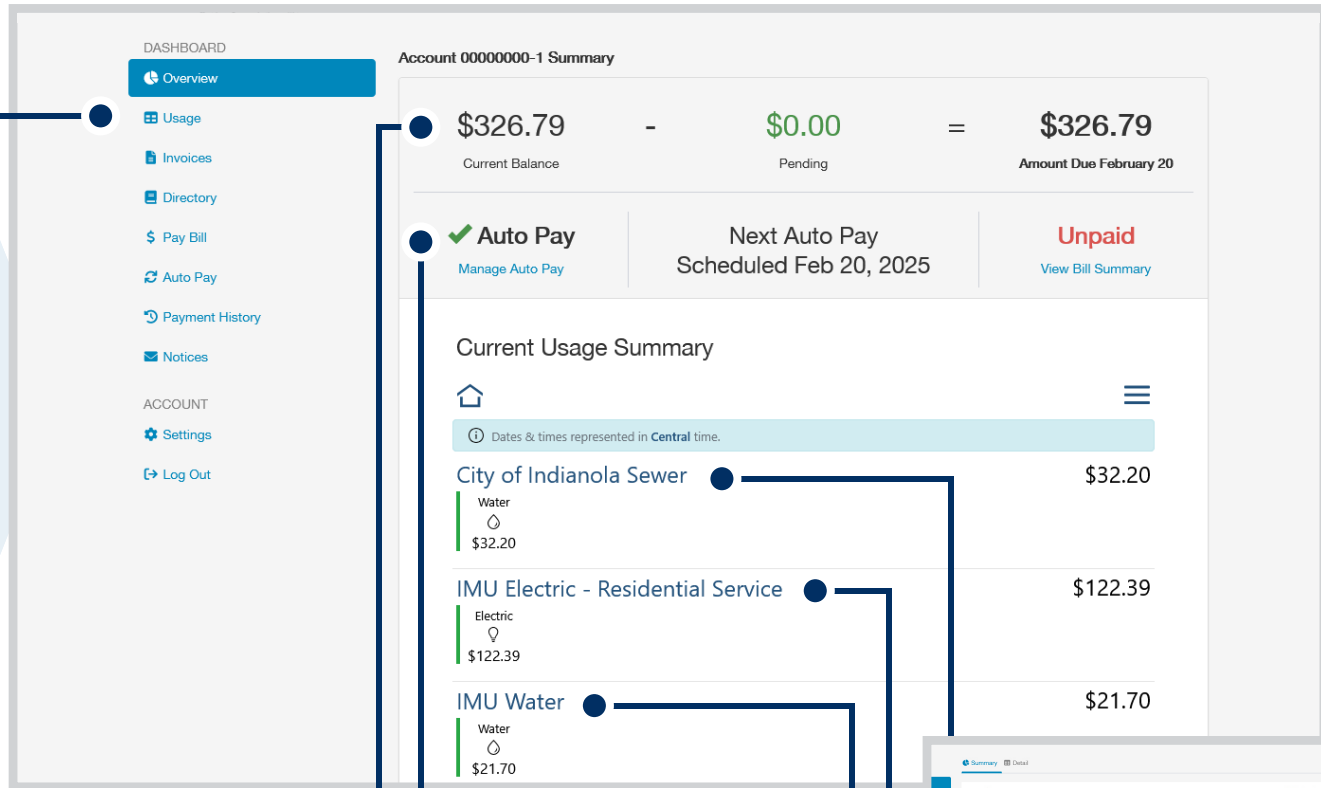

The water treatment process intrigues me. Being able to see the whole process from start to finish is very interesting to me. Not very many people understand the process it takes to get the water that you use everyday. I enjoy having a hand in that. I also enjoy that I am constantly learning new things.

What are some of your hobbies or interests outside of work?

Outside of work I enjoy spending time with my wife and our 1 year old son. We are often spending time with family doing different activities from ride four wheelers to boating.

Your Account, Simplified

Did you know you have convenient online access to manage your IMU account? At <https://my.imufiber.com/>, you can take control of your account by setting up and managing autopay, making one-time payments, and even tracking your utility usage and account activity. This online portal makes it easy to stay on top of your bills and understand your consumption.

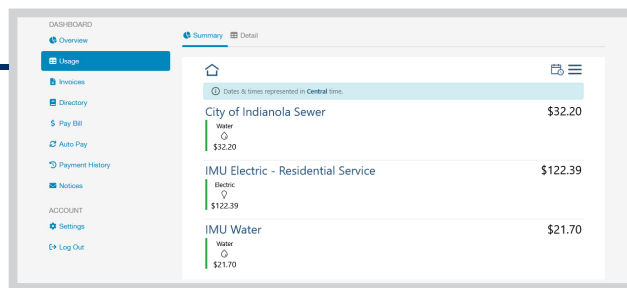

Balance

The current balance is \$326.79 with no pending amounts, making the total amount due \$326.79 by February 20th.

Auto Pay

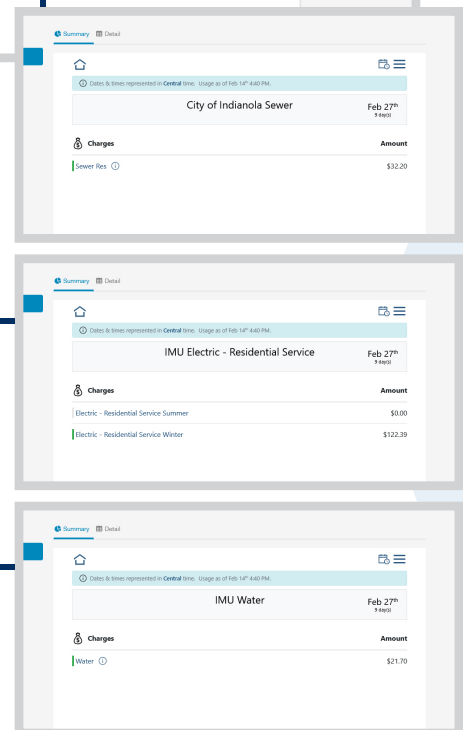

Auto pay is enabled, with the next scheduled payment on February 20, 2025.

Usage Summary

The account includes services for sewer, electric, and water with a breakdown of the current charges for each.

Click usage to view the amount of the service that has been used.
